BLUEGREEN SOLUTIONS

Bilambil

International supplier reference

Australia / Completion year not stated

Challenge

An aged care facility needed water for its landscaped grounds.

Solution

A 180,000-litre rainwater tank was designed beneath a driveway, with filtration for reuse.

Described benefits

The source describes irrigation using stored rainwater and an installation integrated with the landscaped site.

Evidence

Capacity and construction and completed-site photographs are available. Annual water savings, operating costs and water-quality measurements are not reported.

Source

Supplier two-page case study supplied October 2026. Delivered by other organisations.
