BLUEGREEN SOLUTIONS

Prologistics, Scotland

International supplier reference

Scotland, United Kingdom / February 2004

Challenge

Rainwater needed to be collected and stored for reuse at a sports field.

Solution

An underground rainwater reservoir beneath a football field, according to the supplier case study.

Described benefits

The source describes storage without occupying additional above-ground space.

Evidence

Location, application and completion month are stated in the source. Capacity and measured water savings are not provided. Project details have not been independently corroborated.

Source

Supplier two-page case study supplied October 2026. Delivered by other organisations.
